Tests to send for pre-evaluation

These questions and tests are for a standard IVF cycle. In special situations we may ask for additional tests.

Required, no more than one year old

Test	From	Date of result
AMH	Woman	
Vaginal ultrasound report with antral follicle count	Woman	
Semen analysis	Man	

Send only if you already have them (do not have new tests done for this list)

- ☐ FSH, estradiol, TSH, prolactin
- ☐ Hysterosalpingogram (HSG) or a similar tube or uterus test
- ☐ Hysteroscopy, laparoscopy, operation and pathology reports
- ☐ Earlier IVF and embryology reports, with medication doses
- ☐ Karyotype and other genetic reports
- ☐ Male hormone tests and Y chromosome testing
- ☐ HBsAg, anti-HCV, HIV and syphilis results

Broad immune panels and commercial add-on tests are not needed for the pre-evaluation.

> Send the completed questionnaire and your results together: WhatsApp +90 507 380 28 05 or email contact@draksoyivf.com

The pre-evaluation is not a medical examination and no prescription is written at this stage. In Turkey, IVF is limited to married heterosexual couples using their own eggs and sperm.
